

```
\chapter{Sections}
```

In this chapter various levels of sections are shown. By adjusting the following line in the preamble: `\backslash setcounter \{ secnumdepth \} \{ 3 \}`, the depth of numbering can be adapted.

```
\section{Section}
This is a section.
```

```
\subsection{Subsection}
This is a subsection.
```

```
\subsubsection{Subsubsection}
This is a subsubsection.
```

```
\paragraph{Paragraph}
This is a paragraph.
Dit is een sub sectie.
```

```
